As a skilled Computer Science student with a focus on Data Science, I am writing to express my interest in a Computer/Data Science internship or job where I can contribute effectively and further develop my skills. My educational background at Worcester Polytechnic Institute, combined with my hands-on experience in various technical roles, aligns well with the requirements of this position, and I am confident that I would make a valuable addition to your team.

After gaining extensive experience through internships and project work, as well as through collaborative projects on Github. I have developed a robust understanding of both theoretical and practical aspects of Computer Science and Data Science. My coursework has provided me with a strong foundation in algorithms, systems programming, and data analysis, while my project work has allowed me to apply these concepts in real-world scenarios. I excel at:

- Programming in languages such as C, C++, Java, Python, and SQL
- Front and back-end Software Engineering, (HTML, JavaScript, CSS, NodeJS, Ruby)
- Optimization of database performance, analysis of queries, and the creation of functions and stored procedures
- Utilizing tools like MatLab, IntelliJ, Eclipse, and VSCode
- Conducting research on the ethical implications of technological advancements, particularly in Virtual Reality and AI
- Managing and prioritizing tasks to ensure timely and accurate completion of deliverables

In addition to my technical skills, I possess strong interpersonal abilities, which have been developed through various roles, such as my position as a Claims and IT Assistant at The Black Car Fund, as well as my volunteer work as an Educational Instructor at Worcester Ecotarium and a Canvasser for a political campaign in the heart of Brooklyn. These experiences have enhanced my ability to communicate effectively, manage multiple responsibilities, and work collaboratively within a team. I am eager to contribute to the ongoing growth and success of the company I become a part of by leveraging my skills and experiences to support its projects and initiatives, however that may be.

Please review my attached resume for additional details regarding my expertise and achievements. Do not hesitate to reach out if you have any questions or need further clarification on my experience. I would love to meet with the company and discuss this position in detail if that is what is best for both parties.

Thank you for your consideration,

Arman Gevorgyan
